What is claimed is:

1. A semiconductor device including a rewiring, mixedly comprising:

an input/output (I/O) cell connected to a probing pad; and another input/output (I/O) cell having no probing pad.

- 2. A semiconductor device according to claim 1, further comprising a DRAM.
- 3. A semiconductor device according to claim 1, further comprising a fuse element.
 - 4. A semiconductor device according to claim 1, wherein the semiconductor device lacks a probing pad on at least one side.
